

## Smoking Tips:

Thank-you for your purchase of our aluminum smoking tip. Currently, the 22g, 26g, 32g, 40gauge, & 46g tip is the only ones available at this time. The design of these tips is to be used as a part of the packing process of herbs into our molds. No guarantee these will work with other molds.

### Advantages of aluminum smoking tip:

- Reusable
  - Clean and Sanitize for next cigar
  - No purchasing a smoking tip again - wood smoking tips are burnt up as you smoke your cigar
  - Save money since you never have to buy a smoking tip again
- No smoking taste issues
  - No guarantee of chemical traces in wood tips since they are made outside the US
  - Aluminum will not have any taste as the manufacturing of our smoking tips align to food grade standards
- Draw thru a 2.5mm hole to reduce the heat during your inhale versus a 3mm hole

### To use:

- Put the mold together.
- Drop in the smoking tip into the slot.
- Place skewer down through the mold into the smoking tip hole
- Begin packing process by following instructions included with our mold

### Caution:

Keep away from Children

Choking hazard

When smoking and the end of the cigar approaches the tip, heat will transfer into the smoking tip. We recommend putting out your cigar to avoid the tip becoming too hot. Dig out the small amount left and reuse the remaining herbs however you'd like. Clean it up and it'll be ready for your next cigar.
